PROFESSIONAL SUMMARY

Tier 1 SOC Analyst / Incident Responder candidate with hands-on experience in SIEM log monitoring, alert triage, incident investigation, and threat detection, built through 9 self-directed security labs covering Windows and network environments. Brings 3+ years of production experience in ticket triage, SLA compliance, escalation handling, and incident documentation from fintech and enterprise customer support environments - core Tier 1 skills of monitoring queues, prioritizing by severity, and escalating with clear evidence. Currently completing AltSchool Africa's Cybersecurity / SOC Analyst training pathway, with practical exposure to Splunk, Wazuh, Windows Security Event investigation, AWS threat detection, and incident response workflows.

CORE COMPETENCIES

Alert Triage & Escalation | SIEM & Log Monitoring | Incident Response | Threat Detection & Analysis | Windows Event Log Analysis | Network Security Monitoring | Cloud Security (AWS) | Vulnerability Assessment | MITRE ATT&CK Mapping | IOC Collection & Analysis | Incident Documentation & Reporting | SLA Management

TECHNICAL SKILLS

- **SIEM & Detection:** Splunk (SPL - stats, timechart, where), Wazuh (File Integrity Monitoring, Security Events), Windows Event Viewer, PowerShell, MITRE ATT&CK mapping, log correlation & alert triage
- **Web Application Security:** Burp Suite Professional, DVWA, SQL Injection, XSS, CSRF, OWASP Top 10 vulnerability analysis & remediation
- **Cloud Security:** AWS CloudTrail, CloudWatch, EventBridge, Lambda, IAM, Secrets Manager - automated detection & response
- **Networking:** VLAN segmentation, inter-VLAN routing, ACLs, IP addressing/subnetting, Cisco Packet Tracer
- **OSINT & Threat Intelligence:** Amass, theHarvester, Recon-ng, Nmap, NetExec, WHOIS/DNS enumeration, VirusTotal, AbuseIPDB, attack surface mapping
- **Cryptography:** AES-256-CBC, RSA-2048, TLS/SSL, OpenSSL, Wireshark packet analysis
- **Systems & Platforms:** Windows Server, Kali Linux, Ubuntu, VirtualBox, Zendesk, Google Workspace, Trello

CYBERSECURITY PROJECTS & LABS

Self-directed labs completed as part of AltSchool Africa's cybersecurity coursework. Full write-ups, evidence, and screenshots available in the portfolio links above.

Featured Projects

Windows Security Event Investigation Lab - *Windows Event Viewer, PowerShell, Nmap, NetExec, MITRE ATT&CK*

- Investigated a full Windows security incident lifecycle (Event IDs 4624, 4625, 4720, 4732), correlating network enumeration with authentication and privilege escalation activity, and produced a complete SOC incident report mapped to MITRE ATT&CK (T1078, T1098, T1110, T1136)

SOC Phishing Investigation Lab - *PhishTank, VirusTotal, IPinfo, AbuseIPDB, OSINT*

- Investigated a reported phishing domain end-to-end using OSINT and threat intelligence sources, collected Indicators of Compromise, traced hosting infrastructure, and mapped findings to MITRE ATT&CK (T1566.002, T1583)

SSH Brute-Force Detection with Splunk - *Splunk Enterprise, SPL, MITRE ATT&CK*

- Analyzed 12,500+ authentication log events using threshold-based SPL queries to detect brute-force activity; mapped findings to MITRE ATT&CK T1110.001

Wazuh SIEM Monitoring & Compliance - *Wazuh, File Integrity Monitoring*

- Investigated a File Integrity Monitoring alert end-to-end and mapped findings to PCI DSS and ISO 27001 compliance requirements

Additional Labs

- **Web Application Vulnerabilities & Exploitation** - *DVWA, Burp Suite - SQLi, XSS, CSRF exploitation mapped to OWASP Top 10*
- **AWS Honeytoken Detection & Automated Kill-Switch** - *AWS CloudTrail, EventBridge, Lambda, IAM - automated breach response*
- **External Reconnaissance & Attack Surface Mapping** - *Amass, Nmap, theHarvester - OSINT-driven attack surface mapping*
- **Secure Network Segmentation (VLAN + ACL)** - *Cisco Packet Tracer - segmented network with ACL-enforced access control*
- **Applied Cryptography & HTTPS Lab** - *OpenSSL, Wireshark - AES/RSA encryption and HTTP vs. HTTPS traffic analysis*

PROFESSIONAL EXPERIENCE

Customer Support Admin <i>Tech Studio Academy Lagos, Nigeria</i>	Feb 2025 - Dec 2025
- Triaged and tracked incoming support tickets end-to-end, ensuring accurate case assignment and consistent SLA adherence - Maintained internal documentation and knowledge base articles, preserving data integrity and version accuracy across platforms - Identified recurring issue patterns and escalated systemic gaps to management, supporting structured root-cause analysis - Onboarded and trained new support agents on standardized ticket-handling and escalation workflows	
Customer Support Specialist <i>Honey Bucket Texas, USA (Remote)</i>	Mar 2024 - Jan 2025
- Managed escalations for 100+ enterprise clients, reconciling account-level service issues while maintaining SLA compliance - Built and maintained a structured FAQ knowledge base, cutting average ticket resolution time by 30% through improved information accuracy - Documented customer issues and resolutions with precision, creating audit trails that supported service continuity and reporting - Partnered cross-functionally with internal teams to investigate product issues and implement corrective actions	
Customer Care Representative <i>Roqqu Technologies Ltd Lagos, Nigeria (Remote)</i>	Oct 2022 - Jan 2024
- Resolved 50+ weekly customer inquiries across chat, email, and phone in a crypto/fintech environment, achieving a 95% satisfaction rate - Identified and flagged transactional discrepancies and account inconsistencies for review by technical and product teams - Streamlined onboarding documentation, reducing customer setup time by 20% through clearer process flows - Served as a structured feedback channel between users and product teams, ensuring reported issues were documented and escalated	

EDUCATION & TRAINING

B.Sc. Computer Science <i>Lagos State University, Lagos, Nigeria</i>	2018 - 2022
Cybersecurity Track - SOC Analyst Pathway <i>AltSchool Africa (In Progress)</i>	Nov 2025 - Present

CERTIFICATIONS & TRAINING

- Foundational Cybersecurity Training - SOC Analyst Pathway, AltSchool Africa (In Progress)
- Communication in Customer Support - LinkedIn Learning

ADDITIONAL INFORMATION

- **Languages:** English (Fluent)
- **Tools & Platforms:** Zendesk, Trello, Slack, Google Workspace (Docs, Sheets, Drive)
- **Work Preference:** Open to remote, hybrid, and on-site opportunities
