PROFESSIONAL SUMMARY

Customer operations professional with 3+ years reconciling payment discrepancies, managing client escalations, and maintaining structured documentation across fintech and enterprise support environments. Currently building toward a Level 1 SOC Analyst role through AltSchool Africa's cybersecurity track, with hands-on lab experience spanning SIEM log analysis (Splunk, Wazuh), web application penetration testing (OWASP Top 10), cloud threat detection (AWS), and network security. Brings a rare combination of production-grade ticket triage, SLA discipline, and incident documentation experience alongside actively developing technical detection and analysis skills.

TECHNICAL SKILLS

- **SIEM & Detection:** Splunk (SPL stats, timechart, where), Wazuh (File Integrity Monitoring, Security Events), MITRE ATT&CK mapping, log correlation & alert triage
- **Web Application Security:** Burp Suite Professional, DVWA, SQL Injection, XSS, CSRF, OWASP Top 10 vulnerability analysis & remediation
- **Cloud Security:** AWS CloudTrail, CloudWatch, EventBridge, Lambda, IAM, Secrets Manager automated detection & response
- **Networking:** VLAN segmentation, inter-VLAN routing, ACLs, IP addressing/subnetting, Cisco Packet Tracer
- **OSINT & Reconnaissance:** Amass, theHarvester, Recon-ng, Nmap, WHOIS/DNS enumeration, attack surface mapping
- **Cryptography:** AES-256-CBC, RSA-2048, TLS/SSL, OpenSSL, Wireshark packet analysis
- **Systems & Platforms:** Kali Linux, Ubuntu, VirtualBox, Zendesk, Google Workspace, Trello

CYBERSECURITY PROJECTS & LABS

Self-directed labs completed as part of AltSchool Africa's cybersecurity coursework. Full write-ups, SPL/query evidence, and screenshots available in the portfolio links above.

Web Application Vulnerabilities & Exploitation - *DVWA, Burp Suite, OWASP Top 10*

- Exploited SQL Injection, Reflected XSS, and CSRF against a deliberately vulnerable web app; cracked extracted password hashes to demonstrate full account compromise
- Mapped each finding to OWASP Top 10 and CIA-triad impact, and delivered code-level remediation guidance (parameterized queries, output encoding, anti-CSRF tokens)

SSH Brute-Force Detection with Splunk - *Splunk Enterprise, SPL, MITRE ATT&CK*

- Analyzed 12,500+ authentication log events; built threshold-based SPL queries to isolate brute-force IP/username pairs and rank top attacking source IPs
- Built a time-series (timechart) view to pinpoint attack burst windows; mapped findings to MITRE ATT&CK T1110.001

AWS Honeypot Detection & Automated Kill-Switch - *AWS CloudTrail, EventBridge, Lambda, IAM*

- Designed a honeypot-based breach detection pipeline with dual detection paths (CloudWatch + EventBridge) and real-time SNS alerting
- Built an automated Lambda kill-switch that strips IAM permissions from a compromised identity within seconds of detection

Wazuh SIEM Monitoring & Compliance - *Wazuh, File Integrity Monitoring*

- Investigated a File Integrity Monitoring alert end-to-end, tracing a checksum mismatch to a specific file modification event
- Tied detection findings to compliance frameworks (PCI DSS, ISO 27001) to explain business impact, not just technical cause

External Reconnaissance & Attack Surface Mapping - *Amass, Nmap, theHarvester, OSINT*

- Ran a full passive-to-active recon engagement against an authorized domain, combining OSINT with Nmap service/version scanning
- Produced a risk-prioritized attack surface Data Flow Diagram covering API gateway, legacy web server, and mail server exposure

Secure Network Segmentation (VLAN + ACL) - *Cisco Packet Tracer*

- Designed and implemented a 3-department VLAN topology with router-on-a-stick inter-VLAN routing and ACL-enforced access control

Applied Cryptography & HTTPS Lab - *OpenSSL, Wireshark*

- Demonstrated AES-256 and RSA-2048 encryption/decryption, then captured live traffic to show plaintext HTTP vs. encrypted HTTPS in Wireshark

PROFESSIONAL EXPERIENCE

Customer Support Admin Feb 2025 – Dec 2025

Tech Studio Academy | Lagos, Nigeria

- Triaged and tracked incoming support tickets end-to-end, ensuring accurate case assignment and consistent SLA adherence
- Maintained internal documentation and knowledge base articles, preserving data integrity and version accuracy across platforms
- Identified recurring issue patterns and escalated systemic gaps to management, supporting structured root-cause analysis
- Onboarded and trained new support agents on standardized ticket-handling and escalation workflows

Customer Support Specialist Mar 2024 – Jan 2025

Honey Bucket | Texas, USA (Remote)

- Managed escalations for 100+ enterprise clients, reconciling account-level service issues while maintaining SLA compliance
- Built and maintained a structured FAQ knowledge base, cutting average ticket resolution time by 30% through improved information accuracy
- Documented customer issues and resolutions with precision, creating audit trails that supported service continuity and reporting
- Partnered cross-functionally with internal teams to investigate product issues and implement corrective actions

Customer Care Representative Oct 2022 – Jan 2024

Roqqu Technologies Ltd | Lagos, Nigeria (Remote)

- Resolved 50+ weekly customer inquiries across chat, email, and phone in a crypto/fintech environment, achieving a 95% satisfaction rate
- Identified and flagged transactional discrepancies and account inconsistencies for review by technical and product teams
- Streamlined onboarding documentation, reducing customer setup time by 20% through clearer process flows
- Served as a structured feedback channel between users and product teams, ensuring reported issues were documented and escalated

EDUCATION & TRAINING

B.Sc. Computer Science 2018 – 2022

Lagos State University, Lagos, Nigeria

Cybersecurity Track - SOC Analyst Pathway Nov 2025 – Present

AltSchool Africa (In Progress)

CERTIFICATIONS & TRAINING

- Foundational Cybersecurity Training - SOC Analyst Pathway, AltSchool Africa (In Progress)
- Communication in Customer Support - LinkedIn Learning

ADDITIONAL INFORMATION

- **Languages:** English (Fluent)
- **Tools & Platforms:** Zendesk, Trello, Slack, Google Workspace (Docs, Sheets, Drive)
- **Work Preference:** Open to remote, hybrid, and on-site opportunities
